Key drivers

- ▼ Scope & FX effects
- ▼ **Weather and tariff impacts in France**
- ▼ **D3/T2 & D4 outages**
- ▼ Continued expected pressure on thermal generation & outright prices in Europe

Focus on third quarter 2014 performance

Excluding Energy Europe:

- Organic performance shows improvement compared to H1 for all business lines
- COI organic growth is **+15.0% on third quarter yoy**

Business lines trends (vs June 2014) are consistent with expectations:

- ▲ Energy International: partial recovery of H1 adverse Latam hydrology effects
- ▼ Energy Europe: pressure on power & gas margins, nuclear outages, timing of gas price revisions
- ▲ Global Gas & LNG: strong LNG diversions and ramp-up in E&P production
- ▲ Infrastructures: underlying RAB driven growth and favorable storage trend
- ▲ Energy Services: back to organic growth thanks to end of cogeneration tariffs impacts
