Current trading statement on GDF Suez Energy International Business Areas (outside Europe) and certain assets in the UK and Turkey ("GDF Suez Energy International")

"Following the year ended 31 December 2009, GDF Suez Energy International has continued to trade in line with the expectations of its management team and has demonstrated a strong operational and financial performance. Sales and EBITDA for the first half of 2010 increased compared to the same period for the previous year, with strong growth in Latin America and Middle-East Asia compensating for declining performance in North America:

- In Latin America, GDF Suez Energy International's sales and EBITDA benefited from a significant increase in electricity volumes sold and positive foreign exchange effects. In addition, GDF Suez Energy International and Codelco completed the merger of their electricity assets and gas transport activities in Chile. GDF Suez Energy International also commissioned the Sao Salvador power plant.
- In North-America, declining sales and EBITDA reflected the absence of positive one-offs compared to 2009 and negative price effects.
- In Middle-East Asia, GDF Suez Energy International benefited from an overall recovery on power demand and positive impact of development fees.

In addition, since the beginning of 2010, GDF Suez Energy International has maintained a strong development pace with significant commercial successes:

- GDF Suez Energy International won a US$1.7bn contract for building and operating two new power stations in Oman (Barka 3 and Sohar 2).
- EnerSur, GDF Suez Energy International's subsidiary in Peru, was awarded a 662 MW electricity supply contract in Peru.
- GDF Suez Energy International won a contract to build a 1,730 MW power plant in Saudi Arabia. A 20-year power purchase agreement has been signed in connection with the contract.

Overall the outlook for the full year remains strong and GDF Suez Energy International management is confident about the prospects for GDF Suez Energy International for the second half of 2010."
