ENGIE to provide 100 electric buses in Santiago, Chile by 2019

ENGIE was awarded a contract to provide Santiago de Chile's public transportation system with an integrated offer comprising: leasing of 100 electric buses, installation and maintenance of the related electric charging infrastructure supplied with 100% certified renewable energy. This initiative is part of the country's Public Transportation Plan for the Third Millennium announced by President Sebastián Piñera. The plan aims to improve Santiago's public transportation system both in terms of quality and sustainability. The objective is to develop a 100% low-emission system with 6,000 electric buses set for operation by 2040.

With 200 electric buses already functioning by 2019, half of which will be supplied by ENGIE, Chile will become the 2nd country with the largest electric bus fleet after China.

ENGIE has been present in Chile for many years and has established a strong plan for the development of sustainable mobility. Recently, the Group carried out emblematic initiatives: proposal of a light rail system to link Santiago's airport to the city (declared of public interest by local authorities), the implementation of the first electric taxi fleet in Santiago, the development of an intelligent network of charging stations for electric vehicles and the launch of a range of services based on electric mobility to offer delivery and car-sharing through MuvSmart, a start-up company acquired by ENGIE.

ENGIE counts 2,800 employees in Chile who put their expertise into practice in the delivery of centralized and decentralized energy solutions (both electricity and gas), as well as services and solutions for territories. In addition, the Group offers engineering services in the country through its subsidiary Tractebel, and hosts a research and development center.

Pierre Chareyre, ENGIE Executive Vice President, in charge of the Business Units Global Energy Management and Latin America, said: "*Santiago is at the forefront of the energy transition in Latin America and ENGIE is proud to be a partner of choice for Santiago in improving its quality of life and attractiveness.*"

In line with its aim to become the leader of the energy transition for cities and regions, ENGIE delivers a broad range of products and services to enhance quality of life in urban environments. At the heart of the Group's strategy for cities, green mobility is a key lever to improve air quality and reduce green-house gas emission levels, enabling cleaner and efficient fuels, smoother traffic flows and more efficient mass transit.

From the electrification of mass transit in Dakar, Senegal, to the supply of bio compressed natural gas and hydrogen through the first multi-alternative fuel station of France, in Rungis, and the management of traffic flows in Rio de Janeiro, Brazil, ENGIE is at the forefront of the energy revolution in the field of clean transportation and a partner of choice for cities and regions.

About ENGIE

We are a global energy and services group, focused on three core activities: low-carbon power generation, mainly based on natural gas and renewable energy, global networks and customer solutions. Driven by our ambition to contribute to a harmonious progress, we take up major global challenges such as the fight against global warming, access to energy to all, or mobility, and offer our residential customers, businesses and communities energy production solutions and services that reconcile individual and collective interests.

Our integrated - low-carbon, high-performing and sustainable - offers are based on digital technologies. Beyond energy, they facilitate the development of new uses and promote new ways of living and working. Our ambition is conveyed by each of our 150,000 employees in 70 countries. Together with our customers and partners, they form a community of imaginative builders who invent and build today solutions for tomorrow.

2017 turnover: 65 billion Euros. Listed in Paris and Brussels (ENGI), the Group is represented in the main financial (CAC 40, BEL 20, Euro STOXX 50, STOXX Europe 600, MSCI Europe, Euronext 100, FTSE Eurotop 100, Euro STOXX Utilities, STOXX Europe 600 Utilities) and extra-financial indices (DJSI World, DJSI Europe and Euronext Vigeo Eiris - World 120, Eurozone 120, Europe 120, France 20, CAC 40 Governance).
