ENGIE Hellas wins his largest contract for total facility management services in Greece

ENGIE Hellas, a fully owned subsidiary of the French group ENGIE, has signed a total facility management contract for the new Stavros Niarchos Foundation Cultural Center (SNFCC) in Athens. ENGIE Hellas will provide a whole range of services: technical maintenance, energy services, security services, cleaning & waste management and landscaping services. This represents the largest contract of this kind in Greece and is expected to create at least 250 new jobs, including subcontractors.

This 5-year partnership between ENGIE and the Stavros Niarchos Foundation Cultural Center will ensure the highest standards in energy efficiency for the SNFCC following its platinum LEED certification¹ requirements which is the highest possible rating for environmentally conscious and sustainable buildings. ENGIE will also be responsible for the flawless operation and maintenance of the complex technical facilities of the SNFCC, some of which represent technological breakthroughs in the fields of acoustics, lighting and stage engineering. Furthermore, ENGIE will take care of the cleaning and the security of these magnificent facilities, and will be responsible for the upkeep of its unique park and gardens and the water management of the artificial canal.

Altogether, ENGIE will service 28,000 square meters (sqm) of the Greek National Opera building, which includes 2 stages, a dance school, rehearsal rooms, admin areas and other supporting facilities, the 23,000 sqm of the National Library of Greece and the 210,000 sqm of parks and gardens. ENGIE will also be in charge of the facility management of the 33,000 sqm car park.

ENGIE will bring to the SNFCC its long lasting experience in facility management of exceptional cultural centres, such as La Scala di Milano in Italy, the Paris Opera in France and the Sydney Opera in Australia.

The SNFCC was developed through an exclusive grant by the Stavros Niarchos Foundation and designed by the Renzo Piano Building Workshop. The grant included the construction and complete outfitting of the new facilities for the National Library of Greece and the Greek National Opera, as well as the creation of the Stavros Niarchos Park. The aim of the SNFCC is to become a urban, multifunctional complex for education, the arts and entertainment.

¹ LEED stands for "Leadership in Energy and Environmental Design" and is a certificate awarded by the US Green Building Council. To know more: www.usgbc.org

ENGIE is a leading provider of services designed to improve the performance and efficiency of buildings, industry, infrastructure and cities. With over thousands references, across the public and private sectors, ENGIE teams work closely with customers to provide integrated solutions in technical services, facilities management and business processes, often combining these with its energy expertise. Already a leader in Europe, ENGIE, with several tens of thousands of customers, is expanding its business on the five continents. The Group employs more than 100,000 people in services.

ENGIE in Greece

ENGIE has two main activities in Greece: energy and facility management services through ENGIE Hellas, and power generation and supply through Heron Group (owned by ENGIE at 50%)

ENGIE Hellas has been operating in Greece since 2000 and is the leading provider of energy services, technical maintenance and facility management services. It employs more than 130 skilled staff and is currently serving the most prestigious and largest total facility management contracts in the country.

Heron manages 2 power production plants (600 MW capacity) and employs 111 persons. Heron sells electricity and gas to residences and to industrial clients such as MINERVA, ELINOIL, VIVECHROM, Alpha Satellite TV and Central Greece Motorway.

About ENGIE

ENGIE develops its businesses (power, natural gas, energy services) around a model based on responsible growth to take on the major challenges of energy's transition to a low-carbon economy: access to sustainable energy, climate-change mitigation and adaptation and the rational use of resources. The Group provides individuals, cities and businesses with highly efficient and innovative solutions largely based on its expertise in four key sectors: renewable energy, energy efficiency, liquefied natural gas and digital technology. ENGIE employs 154,950 people worldwide and achieved revenues of €69.9 billion in 2015. The Group is listed on the Paris and Brussels stock exchanges (ENGI) and is represented in the main international indices: CAC 40, BEL 20, DJ Euro Stoxx 50, Euronext 100, FTSE Eurotop 100, MSCI Europe, DJSI World, DJSI Europe and Euronext Vigeo (World 120, Eurozone 120, Europe 120 and France 20).
