

RESTATED FY 2018 FIGURES

**FOR IFRS 16 TREATMENT
AND MARCH 2019 IFRIC DECISION**

IFRS 16 – Leases treatment

In January 2016, the IASB has issued a new standard on leases. Under the new standard, all lease commitments will be recognized on the face of the statement of financial position, without distinguishing between operating leases and finance leases.

The main impact on the consolidated statement of financial position is an increase in the “right-of-use assets” on the assets side and an increase of the lease liabilities on the liabilities side, regarding leases where the Group acts as lessee and which are qualified as operating leases. They concern mainly real estate and vehicles. The IFRS 16 treatment will also lead to a **higher financial net debt without any impact on the economic net debt**, as these liabilities were already taken into account in the economic net debt.

In the consolidated income statement, reversal of the rental expenses of these operating leases will lead to an **increase in EBITDA**, which is largely offset by an increase in depreciation and hence there is an **almost neutral impact on current operating income**. There is also a **slight increase in financial expenses, with a global neutral impact at net recurring income, Group share level**.

March 2019 IFRIC decision

Following the March 2019 IFRIC decision regarding commodity derivatives presentation, the Group changed its accounting policy as from the year ended December 31, 2019, with no impact on net income, equity or the current operating income indicator used in the management dialogue and financial communication. The Group now presents unrealized income/(loss) relating to concerned derivatives, whether it represents a seller or buyer position, on the same line as realized income/(loss) arising from their physical settlement, i.e. under “Purchases” within the aggregate now named “Current operating income including operation MtM and share in net income of equity method entities”. The Group has also decided to improve the presentation by nature of the other items of “Current operating income including operating MtM and share in net income of equity method entities”, without impacting the total for this aggregate.

Key financial figures

In €m	FY 2018 Published	IFRS 16	Change in commodity derivatives presentation	FY 2018 Restated
REVENUES	60,596	-	(3,629)	56,967
