- **Scope & FX**: limited negative FX effect (mainly BRL) partly offset by TAG scope-in
- **EBIT organic drivers**:
  - ~€+0.25bn from colder temperature in Europe (mainly GRDF in France)
  - Lower regulated revenues in French gas networks due to RAB remuneration decrease (smoothed)
  - Reversal of 2020 Covid impacts
  - Higher contribution from Latin America, esp. gas transmission in Brazil (indexation)

Belgian nuclear provisions

As at 31 December 2021

Synatom provisions[1]	Dedicated asset	Discount rates	Review pattern	Funding
c. €14.4bn in total: • c. €8.0bn for waste management • c. €6.3bn for dismantling	c. €5.5bn	3.25% for waste management 2.50% for dismantling	Triennial review Next review expected in H2 2022	**Funding of c. €6bn expected over 2022-2024** **Funding commitments:** • 100% for dismantling by 2030 (from 25% in 2021)[2] • 100% for waste management by 2025 (from 25% in 2019)

Sensitivities

Sensitivity of the provisions for waste management of the nuclear fuel cycle

- a change of **10 basis points in the discount rate** used could lead to an **adjustment** of approximately **€260 million** in provisions for the back-end of the nuclear fuel cycle. A fall in discount rates would lead to an increase in outstanding provisions, while a rise in discount rates would reduce the provision amount.
- **10% increase in fees above the royalty rate** for the waste management would lead to an **increase** in provisions of approximately **€175 million**;
- a **five-year advance in expenditure** on temporary storage, conditioning and long-term storage for high-level and/or long-lived radioactive waste would lead to an **increase** in provisions of approximately **€170 million.** A five-year delay in the payment schedule for these various expenses would lead to a decrease of less than that amount;

Sensitivity of the provisions for dismantling nuclear facilities

- a change of **10 basis points in the discount rate** used could lead to an **adjustment** of approximately **€62 million** in dismantling provisions. A fall in discount rates would lead to an increase in outstanding provisions, while a rise in discount rates would reduce the provision amount.

1. Excluding €0.7bn nuclear provisions booked at the level of Electrabel for dismantling related to French drawing rights and low radioactive waste related to ONDRAF
2. Assuming Draft Law is voted through in Belgium

Detailed reporting description

ACTIVITIES	DETAILS
Renewables	Hydro (excl. pumped storage), wind, solar (onshore and offshore), biomass and geothermal
Networks	Gas and power infrastructure (distribution, transport, storage, LNG terminals, power transmission lines), biomethane activities
Energy Solutions	Distributed energy infrastructure and related services, Tractebel, ENGIE Impact, EVBox
Thermal & Supply	Gas, coal, pumped storage, cogeneration, desalination, hydrogen Supply B2C, Services B2C, remaining Supply B2B
Nuclear	Belgium and France (drawing rights)
Others	Corporate, GEMS (GEM + main Supply B2B activities) and GTT

ENGIE’s contribution to the Sustainable Development Goals:

Key contribution — Relevant contribution via Tier 2 objectives

Operationalising decarbonisation

Our ambition:
NET ZERO
BY 2045
across all scopes

A clear climate strategy

- A trajectory aligned with Paris Agreement and SBT certified
- A dedicated governance, incentivized on Group climate ambition success
- A Group Strategy focused on development of renewables & green gases in addition to full coal exit by 2027

A strong GHG emissions steering

- GHG annual forecasts until 2030 fully aligned with Group mid-term financial plan
- GHG management targets for 2022, 2025, 2030 and 2045 at Group and GBU levels
- Analysis of GHG emissions alignment with above targets for all new investments
- Integration of GHG emissions in all GBU Quarterly Business Reviews (QBRs)

A dedicated governance process for new investments

- Analysis of carbon prices impact on new investment and long-term energy prices forecasts
- Bi-monthly reporting to Excom on GHG emissions budget for new investments

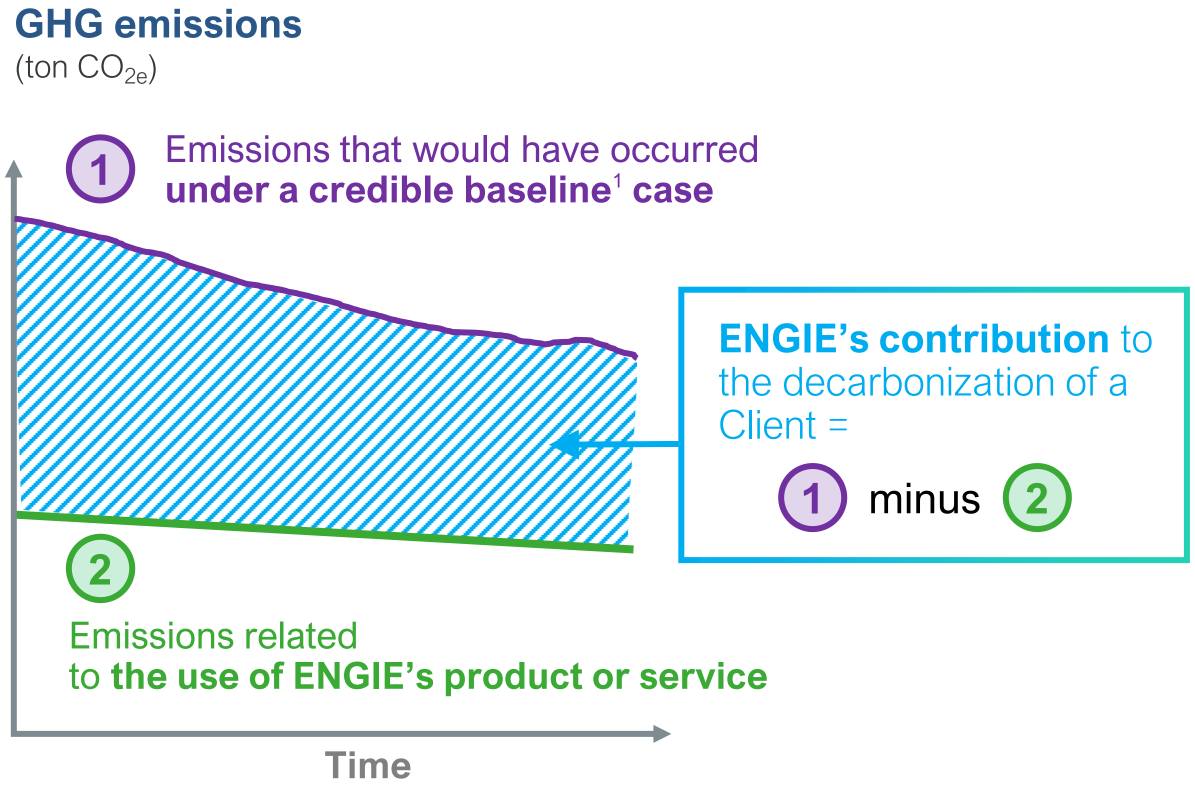
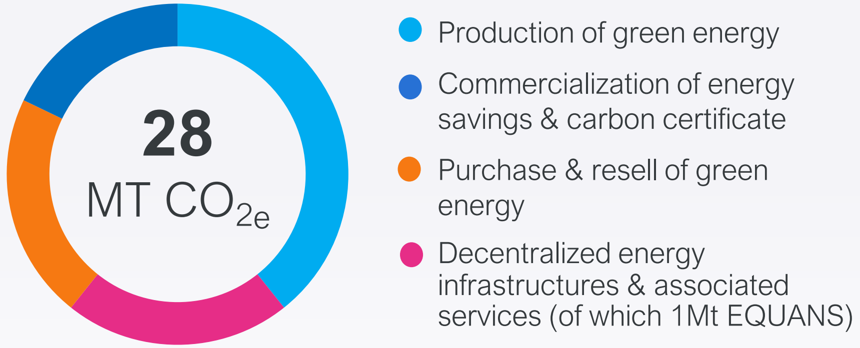
Decarbonisation of Clients emissions through ENGIE products and services

Helping clients incrementally reduce their carbon emissions with a robust methodology



~28 Mt CO_{2e}
avoided for clients in 2021
(21 Mt CO_{2e} in 2020)

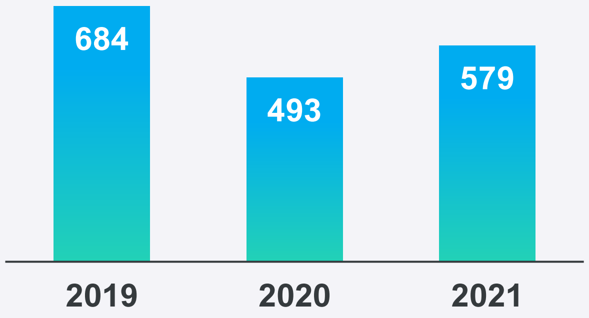


~45 Mt CO_{2e}
avoided / year by 2030

1. The baseline is the most likely alternative in the absence of the product or service provided by ENGIE

Developing a culture to reduce CO_2 for ENGIE as a workplace

CO_2 emissions related to the ways of working
($ktCO_2$ eq.)



CO_2 emissions related to ways of working need 100% of ENGIE employees' commitment

Target: Net-zero carbon by 2030 related to business travel, corporate fleet, commuting, buildings, digital uses and devices.

2021 emissions are 15% below 2019 emissions *(2020 data is not considered relevant due to the pandemic)*.

Employees have endorsed ENGIE's CO_2 reduction target and walk the talk notably strongly limiting their business travel compared to 2019 beyond travel restrictions due to Covid crisis.

ENGIE's Sustainability Academy to support employees' engagement to be active players of ENGIE's strategy through:

- Regular events connecting people and experts to exchange on strategic choices and their impact on business
- Annual Sustainability Learning Days gathering people from all GBUs and Regions
- Learning programs to master sustainability challenges at ENGIE and be able to accompany our business partners' ambitions.

ENGIE's commitment for a just transition

For ENGIE, transitioning to net zero by 2045 means taking into account the social impacts of the energy transition. Therefore, the just transition principles must be embedded in all our projects at local level and must be developed in partnership with workers, unions, communities and suppliers.

In line with the Paris Agreement on Climate Change, ENGIE commits to decarbonise while ensuring a just transition of the workforce and the creation of decent work and quality jobs in accordance with nationally defined development priorities.

1 EMPLOYMENT	Processes and initiatives to boost job opportunities, skills development and employee retention, along with measures to support employees affected by decarbonisation
2 REGIONAL BENEFITS	Initiatives to create economic value for the regions and benefits for the communities
3 STAKEHOLDER INCLUSION	Stakeholder inclusion to promote a just transition in a co-constructive way; seeking cooperation-based solutions between the company, government and civil society

Committed to Just Transition for workers, communities, customers & citizens: examples

Coal phase-out in Chile

- Workplan to reconvert 5 units of coal (800 MW) in 1000 MW of renewable projects (work in progress until 2024)
- **Challenge:** solution to include all stakeholders (communities, unions, local authorities, workers, contractors)
- Closing of the 2 first units without social conflicts, 100% of direct workers (33) relocated
- **Workplan taken for example** for other decarbonization projects by the Chilean Ministry of Energy

COP 26

- ENGIE signatory of the Pledge on energy crisis and just transition coordinated by **C40 Cities Climate Leadership Group, ITUC (International Trade Union Confederation) & BTeam** calling for government leadership in climate crisis and spiraling energy prices

Organic backyards in Mexico

- Construction of a 306 km natural gas transmission pipeline which runs through 3 states
- Workshops with the 89 impacted communities to develop a common social investment program
- For 5 consecutive years training and transfer of knowledge to 100 women & their families to develop backyard gardens in their homes and in community areas.
- **Generation of additional income to the family economy.** With a total investment of $262,000, women have installed 750 m² of greenhouses, develop 4,500 m² of productive land, and generate revenues in the order of $6,200 in 2021

Commercial offers in supply in France

- **“Mon programme pour agir”** gives customers access to a loyalty program: the more their control their consumption, the more points (called KiloActs) they earn. Once enough KiloActs accumulated, customers can invest them in projects that promote energy transition or exchange them for eco-responsible objects that help them consume better

Crowdfunding and shared governance at ENGIE Green

- **Banyuls wind park** (provisional commissioning in 2026) / 6 wind turbines / 13 MW
  40% of the project owned by a citizen cooperative
- **Marcoussis PV park** (commissioned in September 2021) / 20 MW (largest PV park in the Region IDF)
  €18.8m - 20% community / 60% ENGIE / 20% citizens
- **La Tieule PV park , Drôme** (commissioned in mars 2021) / 15 MW on 18 ha

Inclusive development of PV park with positive social & economic impacts on the territory. Co-activities (apiaries, honey plants), work with persons with disabilities for the production of organic honey and aromatic hedge cultivated by a local company, eco-grazing

€100,000 raised as part of a crowdfunding campaign

Highlights:

- Most of ENGIE's outstanding hybrids are green bonds
- Lower cost of funding of ENGIE in the debt capital market in recent years has resulted in significantly lower coupons
- Hybrids are accounted as equity under IFRS 9, explaining why the costs of the hybrids are not included in ENGIE's NRIgs, hence not impacting ENGIE's dividend policy

1. Green bonds
2. Outstanding hybrids as at 31 December 2021
