

1 NO
POVERTY

SDG 1 : End poverty in all its forms everywhere

ENGIE internal NGOs (Energy Assistance) works to provide access to one of the basic services which is energy. They bring lighting and electricity from renewable sources to isolated populations which are distant from any network.

Beneficiaries are opened to new technologies; they benefit of a bigger security at night and have the necessary energy to the development of economic activities and to vital needs (cooking and education).

For instance, since 2014, ENGIE's Foundation funds the Samu social's actions in Paris for the benefit of people in extreme poverty to allow them to find a decent place of accommodation and to offer them a medical and social support.

In addition, ENGIE's Foundation finances projects of Positive Planet Foundation which intervenes to empower the most vulnerable populations, especially in the poorest rural areas.

Target :

1.4 - *By 2030, ensure that all men and women, in particular the poor and the vulnerable, have equal rights to economic resources, as well as access to basic services, ownership and control over land and other forms of property, inheritance, natural resources, appropriate new technology and financial services, including microfinance*

SDG 2 : Zero hunger

ENGIE contributes to this objective through its Foundation and internal NGOs (Energy Assistance) that help by giving affordable and reliable energy to isolated and poor populations.

For instance, Energy Assistance France has partnered in 2018 the French-Dutch association "Sector 10" to enhance the spirulina algae drying reliability in Kenya which is a very rich seaweed in vitamins, minerals, proteins and other nutrients.

5g per day, for a few weeks, is enough to rehabilitate any child suffering from severe malnutrition.

In 2021, production and conservation are ensured, and it is even envisaged to export Madagascar's production to help the victims of Bâtirai's cyclone and the 125 000 victims.

2.1 - By 2030, end hunger and ensure access by all people, in particular the poor and people in vulnerable situations, including infants, to safe, nutritious and sufficient food all year round

SDG 4 : Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

ENGIE's Foundation and the internal NGOs (Energy Assistance) lead or finance access to energy humanitarian projects which promote education and care for children and adults.

These projects concern especially schools' electrification and maintenance since pre-school to higher education, and formation centers for adults that may be formed during the day or throughout night classes.

For instance, since 2015, ENGIE's Foundation has financed Schools, Lights and Rights project which is structured around three axes :

- Schools : schools electrification or reception centers ;*
- Lights : distribution of portable solar lamps ;*
- Rights : distribution of a civil status to children, prerequisite and indispensable to give them access to school, health and legal protection.*

TARGETS :

4.4 - *By 2030, substantially increase the number of youth and adults who have relevant skills, including technical and vocational skills, for employment, decent jobs and entrepreneurship*

SDG 14 : Conserve and sustainably use the oceans, seas and marine resources

Through its engagements in terms of biodiversity, ENGIE contributes to preservation of coastal and marine ecosystems by the setting up of establishes action plans in consultation with the stakeholders. Among these actions, the Ecological monitoring of rivers and mangrove restoration in the Middle East can be found.

ENGIE also contributed to the development of the Ocean benchmark and to the associated Ocean approved label.

For instance, EDT ENGIE has carried out several projects, including one for the protection of turtles. To this end, EDT sponsors the Te Mana O Te Moana association, founded in 2004, which works to protect the Polynesian marine world and in particular marine turtles through its discovery, education and protection activities. EDT ENGIE is also extending its sponsorship of the Tamarii Pointe des Pêcheurs association, which aims to promote and ensure the protection of the lagoon and its environment at Pointe des Pêcheurs on the island of Tahiti.

TARGET :

14.2 - *By 2020, sustainably manage ad protect marine and coastal ecosystems to avoid significant adverse impacts, including by strengthening their restoration in order to achieve healthy and productive oceans*
