Utilities - Non US

# Engie S.A.

Fitch Ratings' affirmation of Engie's ratings in July 2023 reflects the company's robust business profile, with scale, diversification and a big share of regulated, quasi-regulated or contracted EBITDA supporting cash flow predictability. The rating also considers Engie's low carbon power generation and investment plan focused on the energy transition, while targeting reported economic net debt of up to 4.0x EBITDA, consistent with its rating sensitivities.

Its recently signed agreement with the Belgian government on the lifetime extension of two nuclear reactors reduces Engie's rating headroom but also eliminates uncertainty over future changes in nuclear waste provisions.

The Stable Outlook reflects our expectations that credit metrics will remain within our rating sensitivities in 2023-2025, albeit with no rating headroom from 2024.

## **Key Rating Drivers**

Reduced Leverage Headroom: We expect nuclear-adjusted funds from operations (FFO) net leverage to average 3.7x in 2023-2025, up from 3x in 2022, but with no headroom from 2024 against our negative sensitivity of 4.0x. This is largely driven by a large capex plan and additional cash payments for nuclear waste liabilities based on the recently signed agreement with the Belgian government. The Fitch rating case is broadly in line with management's case, but reflects some conservative EBITDA assumptions due to volatility in power prices.

Large Increase in Capex: Engie's 2023-2025 business plan includes EUR22 billion-25 billion of growth capex, a steep increase from the EUR15billion-16 billion of its 2021-2023 plan. The majority of this is allocated to renewable growth capacity (55%-65%), aimed at increasing installed renewable capacity to 50GW by 2025 from 38GW at end-2022 (at 100% ownership), through investments in onshore and offshore wind and solar, with largely contracted and predictable earnings.

The remainder will be spent on networks, infrastructure assets and flexible generation. We expect around 75% of growth capex to be aligned with EU taxonomy of climate change mitigation.

**Transfer of Nuclear Waste Liabilities:** The transfer of EUR15 billion of nuclear waste provisions to the Belgian state will cover Engie's existing and future nuclear waste liabilities. Higher liabilities from the agreement with the state will lead to more cash outflows estimated at EUR5 billion in 2024-2025, which we take into account below free cash flow (FCF). Positively, Engie will no longer be liable for the nuclear waste storage on its Belgian fleet.

We expect Engie to stop its nuclear production in Belgium by end-2025, apart from units in its joint venture (JV) with the Belgian state.

**Nuclear Lifetime Extension:** Engie announced in June 2023 an interim agreement with the Belgian state on a 10-year extension of Doel 4 and Tihange 3 nuclear units to 2035. The two units will be held in the JV, equally owned by the Belgian state and Engie, limiting operational risks for the group. The details of the contract-for-difference mechanism and performance-linked incentives for the plants have yet to be defined. The extension capex, estimated at EUR1.6 billion-2 billion, will be equally funded by Engie and the government.

Djivan Torossian +44 20 3530 2617 djivan.torossian@fitchratings.com

**Solid Business Mix:** We expect the share of regulated, quasi-regulated or contracted EBITDA to increase moderately towards 70% by 2025 from around 63% in 2022, when the contribution of merchant activities is inflated by buoyant prices. Engie's plan to accelerate growth in renewables and infrastructure assets with largely predictable cash flows is consistent with the group's increasing focus on the energy transition and should bring the business mix closer to peers'.

**Conservative Financial Policy:** Engie expects to largely fund its capex plan and dividends with operating cash flow and asset disposals to maintain a strong balance sheet. It continues to target economic net debt-to-EBITDA of up to 4x over the long term, which we view as commensurate with our sensitivities for the rating.

Strong Performance in 1Q23: Engie reported solid 1Q23 results, with reported EBITDA showing organic growth of 16%, driven by global energy management and sales (GEMS) and renewables mainly due to a mix of higher commodity prices or higher volumes. This was partially offset by its retail and nuclear businesses, due to lower prices as a result of market normalisation for the first, and lower volumes and windfall taxes for the second. Engie recently upgraded its 2023 EBITDA indicative range (excluding nuclear) by EUR2 billion to EUR12.9billion-13.9 billion, reflecting continued strong performance in April and May 2023.

**Nuclear-Adjusted Leverage:** We continue to adjust our leverage ratio to consider the unfunded portion of Belgian nuclear dismantling provisions, except for the two reactors that will be transferred to the JV. In our view this improves comparability with peers, as Engie does not plan to fully fund these provisions by 2025, when the last nuclear plants are due to be decommissioned. Engie plans to fully fund dismantling provisions by 2030, while nuclear waste provisions will be fully funded by the restart of the extended units (expected between November 2025 and November 2026) and, based on the recently signed agreement, transferred to the Belgian state.

## **Financial Summary**

(EURm)	2020	2021	2022	2023F	2024F	2025F

## **Rating Derivation Relative to Peers**

Engie's business mix (about 70% regulated, quasi-regulated or contracted EBITDA) compares well with that of Enel S.p.A. (BBB+/Stable) and Iberdrola, S.A. (BBB+/Stable), which are its closest peers, in our view. Enel and Iberdrola benefit from a higher share of regulated networks in EBITDA and larger operations in renewables leading to better earnings predictability.

In addition, Engie is more exposed to the gas industry, which we view as a weakness in light of its higher long-term climate risks compared to electricity. Engie's growth in renewables and infrastructure assets will bring its business mix closer to those of Enel and Iberdrola, which are leading the energy transition. We view Engie's geographic mix as stronger than Enel's due to a lower exposure to higher-risk countries, including in LatAm. Overall, we view Engie's debt capacity as slightly lower than Enel's and Iberdrola's at their respective ratings, with the rating differential attributed to Engie's lower expected leverage.

Engie's higher debt capacity than Electricite de France's (EDF, BBB+/Stable) reflects the latter's weaker business profile (also due to higher operational risk entailed in its investment plan and asset base) and large negative FCF expected across its business plan. EDF's Issuer Default Rating (IDR) benefits from a two-notch uplift over its Standalone Credit Profile, due to the application of Fitch's Government-Related Entities (GRE) Rating Criteria.

We rate Engie on a standalone basis because the French state, with 23.6% of its share capital and 33.6% of the voting rights, does not have economic or voting control over Engie.

Fitch aligns the ratings of Engie's subsidiary Engie Invest International S.A. (A-/Stable) with the ratings of Engie based on the parent's guarantees of its debt. Another subsidiary Electrabel S.A. is rated at the same level as Engie, reflecting strong operational and strategic ties, including Electrabel's about 40% contribution to group EBITDA, and despite the absence of guarantees and a less predictable business mix.

## **Rating Sensitivities**

#### Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade:

- Reduction of nuclear-adjusted FFO net leverage to below 3.2x on a sustained basis.
- Positive FCF on sustained EBITDA growth.

#### Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade:

- Nuclear-adjusted FFO net leverage above 4x on a sustained basis.
- Substantial reduction in the share of regulated, quasi-regulated and contracted EBITDA.
- Adverse regulatory or fiscal changes affecting the predictability of cash flows.
- For Electrabel and other subsidiaries, materially weaker ties with Engie.

## **Liquidity and Debt Structure**

**Sound Liquidity:** Fitch-calculated readily available cash and cash equivalents amounted to EUR16.1 billion as of 31 December 2022. Unused committed liquidity facilities at the same date were an additional EUR12.5 billion. The main two committed facilities are syndicated lines for EUR5 billion maturing in December 2025 and for EUR4 billion maturing in December 2027. Fitch believes that liquidity is sufficient to meet Engie's operating needs and debt maturities at least in the next 24 months.

Engie faces a manageable increase in liquidity needs for trading and hedging activities. It also has solid access to the debt-capital market as a frequent bond issuer and a large issuer of green bonds.

## **ESG Considerations**

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/esg.

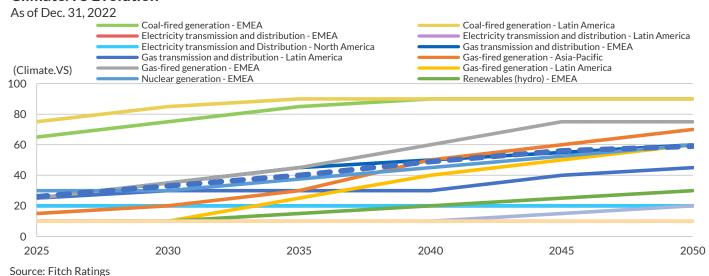

## **Climate Vulnerability Considerations**

Fitch's Climate Vulnerability in Corporate Ratings Criteria report describes how we use Climate Vulnerability Signals (Climate.VS) as a screening tool to identify sectors and Fitch-rated issuers that are potentially most exposed to credit-relevant climate transition risks and, therefore, require additional consideration of these risks in rating reviews. Click here for the criteria.

The FY22 EBITDA-weighted Climate.VS is 40 out of 100 by 2035 suggesting moderate exposure to climate-related risks in that year.

## **Key Assumptions**

## Fitch's Key Assumptions within Our Rating Case for the Issuer:

- Reported EBITDA for 2023 excluding nuclear close to the lower end of Engie's guidance of EUR12.9 billion-13.9 billion.
- EBITDA in networks in France based on allowed returns for the current regulatory period, and a reduced return thereafter.
- Growing EBITDA in renewables and client solutions in 2023-2025, fuelled by large capex.
- Growth capex of around EUR22 billion for 2023-2025, with renewables accounting for around 55%-65%, networks 15%-20% and energy solutions 10%-15%.
- Maintenance capex of around EUR8 billion for 2023-2025.
- Dividends in 2023-2025 in line with Engie's dividend policy (65%-75% of the group's net recurring result, with a floor of EUR0.65 per share).
- Asset disposals of EUR4 billion-4.5 billion in 2023-2025.
- Net funding of nuclear provisions of about EUR3 billion a year in 2023-2025, in line with the management's assumptions, supplemented by additional funding of EUR4.5 billion in 2024 and EUR0.5 billion in 2025 as part of the agreement with the Belgium government.

#### How to Interpret the Forecast Presented

The forecast presented above is based on Fitch Ratings' internally produced, conservative rating case forecast. It does not represent the forecast of the rated issuer. The forecast set out above is only one component used by Fitch Ratings to assign a rating or determine a rating outlook, and the information in the forecast reflects material but not exhaustive elements of Fitch Ratings' rating assumptions for the issuer's financial performance. As such, it cannot be used to establish a rating, and it should not be relied on for that purpose. Fitch Ratings' forecasts are constructed using a proprietary internal forecasting tool, which employs Fitch Ratings' own assumptions on operating and financial performance that may not reflect the assumptions that you would make. Fitch Ratings' own definitions of financial terms such as EBITDA, debt or free cash flow may differ from your own such definitions. Fitch Ratings may be granted access, from time to time, to confidential information on certain elements of the issuer's forward planning. Certain elements of such information may be omitted from this forecast, even where they are included in Fitch Ratings' own internal deliberations, where Fitch Ratings, at its sole discretion, considers the data may be potentially sensitive in a commercial, legal or regulatory context. The forecast (as with the entirety of this report) is produced strictly subject to the disclaimers set out at the end of this report. Fitch Ratings may update the forecast in future reports but assumes no responsibility to do so. Original financial statement data for historical periods is processed by Fitch Solutions on behalf of Fitch Ratings. Key financial adjustments and all financial forecasts credited to Fitch Ratings are generated by rating agency staff.

# Corporates Ratings Navigator EMEA Utilities

opera	ung	Environment		
aa+		Economic Environment	aa	Very strong combination of countries where economic value is created and where assets are located.
aa	ı	Financial Access	aa	Very strong combination of issuer-specific funding characteristics and the strength of the relevant local financial market.
		Systemic Governance	aa	Systemic governance (eg rule of law, corruption, government effectiveness) of the issuer's country of incorporation consistent with 'aa'.
b-	ı			
ccc+				
Rever	nue V	isibility		
a+		Size and Integration	а	Top-tier position in more than one market. Vertically integrated (typically including generation, transmission, distribution and supply).
а	П	Earnings from Regulated Network Assets	bbb	Less than 40% of EBITDA comes from high-quality regulated network assets.
		Ougei-Regulated Earnings		Over 20% of EBITDA comes from quasi-regulated assets in markets or from long-term

а		Fundamental Market Trends	bb	Markets with structural challenges.
a-	T	Generation and Supply Positioning	а	Strong position in the merit order; effective hedging; flexible fuel procurement. Generation balanced with strong position in supply and services.
bbb+	ш	Customer Base and Counterparty Risk	а	Economy of area served provides structurally stable background; low counterparty risk; high collection rates for supply operations.
bbb	ı			
bbb-				

### Profitability and Cash Flow

a-		Free Cashflow	bb	Structurally negative FCF across the investment cycle.
bbb+	T	Volatility of Profitability	bbb	Stability and predictability of profits in line with utility peers.
bbb				
bbb-	и

Exposure to Environmental Impacts	3	Plants' and networks' exposure to extreme weather	Asset Base and Operations; Profitability and Cash Flow

# 5 3 2 1

How to Read This Page
ESG relevance scores range from 1 to 5 based on a 15-level color gradation. Red
(5) is most relevant to the credit rating and green (1) is least relevant.
The Environmental (E), Social (8) and Governance (3) tables break out the
ESG general issues and the sector-specific issues that are most relevant to each
industry group. Relevance scores are assigned to each sector-specific issue,
signaling the credit-relevance of the sector-specific issues to the issuer's overall
credit rating. The Criteria Reference column highlights the factor(s) within which
the corresponding ESG issues are captured in Fitch's credit analysis. The vertical
color bars are visualizations of the frequency of occurrence of the highest
constituent relevance scores. They do not represent an aggregate of the
relevance scores or aggregate ESG credit relevance.
The Credit-Relevant ESG Derivation table's far right column is a visualization of
the frequency of occurrence of the highest ESG relevance scores across the
combined E, S and G categories. The three columns to the left of ESG Relevance
to Grodit Rating summarize rating relevance and impact to credit from ESG
sissues. The box on the far left identifies any ESG Relevance Sub-factor issues
that are drivers or potential drivers of the issuer's credit rating (corresponding
with scores of '4' and '5' are assumed to result in a negative impact unless
indicated with a'+ sign for porsitive impact.
Classification of ESG issues has been developed from Fritch's sector ratings
criteria. The General Issues and Sector-Specific Issues draw on the
classification standards published by the United Nations Principles for
Responsible Investing (PRI), the Sustainability Accounting Standards Board
(SASB), and the World Bank.

CREDIT-RELEVANT ESG SCALE

#### Social (S) Relevance Scores

General Issues	S Score	Sector-Specific Issues	Reference
Human Rights, Community Relations, Access & Affordability	3	Product affordability and access	Profitability and Cash Flow; Regulation
Customer Welfare - Fair Messaging, Privacy & Data Security	3	Quality and safety of products and services; data security	Profitability and Cash Flow
Labor Relations & Practices	3	Impact of labor negotiations and employee (dis)satisfaction	Profitability and Cash Flow; Financial Structure; Financial Flexibility
Employee Wellbeing	2	Worker safety and accident prevention	Profitability and Cash Flow, Financial Structure; Financial Flexibility
Exposure to Social Impacts	3	Social resistance to major projects that leads to delays and cost increases	Asset Base and Operations; Profitability and Cash Flow

# 5 4 3

2

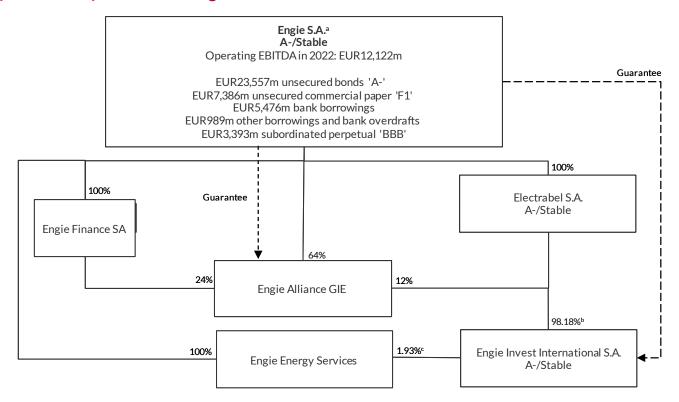

#### Governance (G) Relevance Scores

General Issues	G Score	Sector-Specific Issues	Reference
Management Strategy	3	Strategy development and implementation	Management and Corporate Governance
Governance Structure	3	Board independence and effectiveness; ownership concentration	Management and Corporate Governance
Group Structure	3	Complexity, transparency and related-party transactions	Management and Corporate Governance
Financial Transparency	3	Quality and timing of financial disclosure	Management and Corporate Governance

5	Highly relevant, a key rating driver that has a significant impact on the rating on ar individual basis. Equivalent to "higher" relative importance within Navigator.
4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
2	Irrelevant to the entity rating but relevant to the sector.
1	Irrelevant to the entity rating and irrelevant to the sector.

#### **SOLICITATION & PARTICIPATION STATUS**

For information on the solicitation status of the ratings included within this report, please refer to the solicitation status shown in the relevant entity's summary page of the Fitch Ratings website.

For information on the participation status in the rating process of an issuer listed in this report, please refer to the most recent rating action commentary for the relevant issuer, available on the Fitch Ratings website.

#### **DISCLAIMER & DISCLOSURES**

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <a href="https://www.fitchratings.com/understandingcreditratings">https://www.fitchratings.com/rating-definitions-document</a> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <a href="https://www.fitchratings.com/site/regulatory">https://www.fitchratings.com/site/regulatory</a>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA-or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information hey provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$1,500,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary fro

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see https://www.fitchratings.com/site/regulatory), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
